

If the question says...	Look for these keywords	Usually the answer is...	Why this is the clue
analyze spending over time	cost trends, spend history, charts, graph, forecast	AWS Cost Explorer	It is for viewing and analyzing cost and usage data.aws.amazon+1
see where money is going	cost breakdown, service spend, linked account, region, tag	AWS Cost Explorer	It helps break down and filter spend data.aws.amazon+1
predict future spend	forecast, projected cost, future cost	AWS Cost Explorer	Forecasting is a classic Cost Explorer signal.aws.amazon+1
get alerts before overspending	budget, threshold, notification, alert	AWS Budgets	Budgets is built for spending alerts and limits. linkedin
find savings recommendations	best practice, recommendation, optimize, reduce waste	AWS Trusted Advisor	Trusted Advisor gives improvement recommendations.aws.amazon+1
detect unused resources	idle, underutilized, unused, rightsize	AWS Trusted Advisor	Rightsizing and waste reduction are Trusted Advisor cues.aws.amazon+1
check service limits	service limits, quota, account limits	AWS Trusted Advisor	It checks limits and warns about risks.aws.amazon+1
improve security posture	security check, vulnerability, configuration issue	AWS Trusted Advisor	Security checks are part of its recommendations.aws.amazon+1
improve fault tolerance	fault tolerance, resilience, redundancy	AWS Trusted Advisor	Fault tolerance recommendations point here.aws.amazon+1
faster content delivery	cache, edge, low latency, global users	Amazon CloudFront	Edge caching is the giveaway. youtube

cache content closer to users	edge location, CDN, global distribution	Amazon CloudFront	CloudFront uses edge locations. youtube
store files	bucket, object, upload, download, lifecycle	Amazon S3	Buckets and objects indicate S3. youtubetutorialsdojo
elastic virtual server	instance, VM, virtual machine, compute	Amazon EC2	EC2 is AWS's virtual server service. youtubetutorialsdojo
serverless app	no server, event-driven, run code	AWS Lambda	Lambda is the serverless keyword. youtubetutorialsdojo
SQL database	relational, SQL, schema, tables, joins	Amazon RDS	Managed relational database questions point to RDS. youtubetutorialsdojo
NoSQL database	key-value, low latency, flexible schema	Amazon DynamoDB	NoSQL and key-value usually mean DynamoDB. youtubetutorialsdojo
DNS or domain routing	domain name, hostname, route traffic	Amazon Route 53	DNS and routing clues point to Route 53. youtubetutorialsdojo
record API activity	API calls, audit, history, tracking	AWS CloudTrail	CloudTrail logs account activity. youtubetutorialsdojo
monitor metrics and alarms	metrics, alarms, logs, dashboard	Amazon CloudWatch	Monitoring keywords point to CloudWatch. youtubetutorialsdojo
manage permissions	user, role, policy, access, permission	AWS IAM	IAM handles identity and access control. youtubetutorialsdojo
temporary access	assume role, temporary credentials	AWS IAM Role	Temporary access usually means role, not user. youtubetutorialsdojo

secure root account	root user, MFA, avoid daily use	AWS IAM / root best practice	Root account protection is a common IAM exam theme. youtubetutorialsdojo
encrypt data	encryption, key management, KMS, keys	AWS KMS	Key management and encryption clues point here. youtubetutorialsdojo
protect internet traffic	firewall, allow/deny traffic, inbound/outbound	Security Group	Security Group is the common EC2 network firewall clue. youtubetutorialsdojo
control subnet traffic	subnet-level rule, stateless filtering	Network ACL	NACL is the subnet firewall clue. youtubetutorialsdojo
isolate networks	VPC, private subnet, public subnet	Amazon VPC	VPC is the network isolation clue. youtubetutorialsdojo
hybrid connection	on-premises, private connection, direct link	AWS Direct Connect	Direct Connect is the hybrid connectivity clue. youtubetutorialsdojo
VPN over internet	encrypted tunnel, site-to-site	AWS VPN	VPN keywords mean encrypted network tunnel. youtubetutorialsdojo
load balance traffic	distribute traffic, multiple targets, high availability	Elastic Load Balancing	Balancing and distributing traffic point here. youtubetutorialsdojo
scale automatically	traffic changes, add/remove instances, scaling group	Auto Scaling	Auto scale is the giveaway term. youtubetutorialsdojo
define infrastructure as code	template, repeatable setup, stack, automated deployment	CloudFormation	Templates and stacks point to CloudFormation. examtopics

deploy app with minimal ops	platform, deploy code, managed deployment	Elastic Beanstalk	Simpler deployment with managed infra points here. youtubetutorialsdojo
container orchestration	containers, cluster, tasks, pods, Kubernetes	ECS / EKS	Container keywords identify ECS or EKS. youtubetutorialsdojo
serverless containers	no server, container runtime, pay per use	AWS Fargate	Fargate is the serverless container clue. youtubetutorialsdojo
archive data cheaply	archive, long-term retention, infrequent access	S3 Glacier / Glacier Deep Archive	Archive and long-term storage keywords point here. youtubetutorialsdojo
block storage for EC2	volume, snapshot, disk, attached storage	Amazon EBS	Block storage and volumes indicate EBS. youtubetutorialsdojo
shared file storage	file system, shared access, NFS	Amazon EFS	Shared file-system language means EFS. youtubetutorialsdojo
data warehouse	analytics, OLAP, business intelligence	Amazon Redshift	Warehousing and analytics keywords point here. youtubetutorialsdojo
cache database data	in-memory, faster reads, low latency	Amazon ElastiCache	Caching and speed clues point to ElastiCache. youtubetutorialsdojo
data migration appliance	migrate large data, ship device, offline transfer	AWS Snowball	Physical transfer and migration clues indicate Snowball. youtubetutorialsdojo
manage many accounts	organizations, consolidated billing, governance	AWS Organizations	Multiple accounts and central billing point here. youtubetutorialsdojo
compare AWS spending	billing, trends, accounts, service usage	Cost Explorer	This overlaps with the cost-analysis pattern.aws.amazon+1

set spending guardrails	max spend, warning, threshold, limit	AWS Budgets	Budgeting and notification are the clues. linkedin
check account best practices	optimization, recommendations, health	Trusted Advisor	Best-practice checks mean Trusted Advisor.aws.amazon+1
estimate monthly cost	pricing calculator, forecast before launch	AWS Pricing Calculator	Estimation before deployment points here. youtubetutorialsdojo
compare support plans	basic, developer, business, enterprise, phone support	AWS Support Plans	Support level and response time questions point here.aws.amazon+1
review account health	checks, recommendations, limits, security findings	AWS Trusted Advisor	Health-check language usually means Trusted Advisor.aws.amazon+1
reduce latency worldwide	global users, CDN, cached content, edge	CloudFront	Low-latency global delivery points here. youtube
store static website files	website hosting, static content, bucket	Amazon S3	Static site hosting generally points to S3. youtubetutorialsdojo
permission for a service to access another service	assume role, service access, temporary permission	IAM Role	Cross-service access is a role clue. youtubetutorialsdojo
secret credentials storage	password, secret, API key, rotation	AWS Secrets Manager / Systems Manager Parameter Store	Secrets and rotation language points here. youtubetutorialsdojo

global traffic routing	latency-based routing, health checks, DNS	Route 53	Global routing plus DNS points here. youtubetutorialsdojo
patching responsibility	who patches OS, who secures host	Shared Responsibility Model	The phrase is a shared responsibility clue. aws.amazonyoutube
logging resource changes	configuration history, drift, compliance	AWS Config	Configuration tracking and compliance point here. youtubetutorialsdojo
detect threats	threat detection, unusual API calls, malware	GuardDuty / Inspector	Threat detection language points here. youtubetutorialsdojo
